

WHAT IS CLAIMED IS:

1. A CCFL tube device comprising:

a tube made of transparent materials;

a CCFL disposed in the tube and having a lamp exposed by two ends

5 thereof;

a cap covering each end of the tube; and

two terminals symmetrically arranged in the cap for electrically connecting  
the lamp.

2. The CCFL tube device as claimed in claim 1, wherein the cap is glued to the

10 tube for firm connection.

3. The CCFL tube device as claimed in claim 1, wherein the terminals  
penetrate through and secure to the cap, each terminal is a hollow pipe and the  
lamp is exposed by the CCFL to accommodate each of the terminals, and each  
terminal is soldered to the lamp following cutting tips of the terminals for

15 electrical connection between the lamp and each of the terminals.
